PROFESSIONAL SUMMARY

Motivated final-year Information Technology student at North-West University with a strong foundation in database management, web development, and mobile app creation. Proficient in Java, C#, C++, Python, and full-stack technologies, with hands-on experience building end-to-end applications that solve real-world challenges. Disciplined and team-oriented, seeking to grow into a Full-Stack Developer role by delivering efficient, impactful software solutions.

TECHNICAL SKILLS

- Languages: Java, C#, C++, Python, HTML, CSS, SQL, SQL Server
- Core Competencies: Systems Analysis & Design, Web Development, Mobile Application Development, Database Design & Management, Software Development, Problem Solving & Logical Thinking
- Tools & Platforms: Git, Microsoft Office Suite

PROJECT EXPERIENCE

Zero Waste Hub

Recycling Management System

- Designed a recycling management system to support sustainability within the community.
- Built functionality to track recyclable materials, record purchases, and maintain a materials database.
- Digitized waste-management workflows to optimize resource flow and encourage greener practices.

RoomZa

South African Tourism Mobile Application

- Developed a mobile application showcasing South Africa's provinces and tourist attractions.
- Designed an intuitive interface to guide users through regional points of interest.
- Implemented navigation and local-insight features to encourage domestic travel and tourism.

VhaDau Nursery Website

Agricultural Educational Platform

- Built a website displaying crops, their health benefits, and suitable planting locations.
- Integrated an email inquiry feature connecting producers and consumers.
- Created an educational hub promoting soil health, sustainable farming, and healthy eating.

Web Calculator

Front-End Web Application

- Engineered a responsive, web-based calculator for everyday mathematical tasks.
- Styled with a professional dark theme for improved visibility and usability.
- Balanced clean UI design with accurate, reliable calculation logic.

Church Year Plan

Event Scheduling Tool

- Developed a digital tool to track and manage church events and sermons throughout the year.
- Simplified administrative scheduling to keep community members informed of activities.
- Organized complex annual calendars into an easy-to-access digital format.

EDUCATION

Bachelor of Science in Information Technology

2024 – Present

North-West University (NWU) — Final-Year Student
